

Electric Lady

Tesla Boy

Soul, soul needs more
I need your touch you're electrical girl
My mind is breaking the ties
Of your supernatural type Your pulse my pulse are synchronized
We are synchronized I wanna make love with you all night Let, let it go I want to crack you and
get to the core
Why don't we start to reveal
Our forced superpassional thrill Your pulse my pulse are synchronized
We are synchronized
I wanna make love with you all night
