

# You, You

## Otilia

You make me feel safe and  
It's real, take me to heaven  
My everything is you I found myself in you I see my reflection  
Oh, I need your affection  
You're travelling inside my heart  
Keep sailing for my love, don't stop I can't imagine what happens tomorrow  
But I know we can figure it out  
I know we can figure this out You, you, ooh, I'm loving, loving, loving you  
For everything that you ever do  
You, you, ooh, I'm loving, loving, loving you  
For everything that you ever do  
In love and excited  
Oh boy, come, you're invited  
To have and treat me right  
All now, all day, all night  
Been waiting forever for us to be together  
So baby, come and light me up  
I'm gonna raise you to the top I can't imagine what happens tomorrow  
But I know we can figure it out  
I know we can figure this out You, you, ooh, I'm loving, loving, loving you  
For everything that you ever do  
You, you, ooh, I'm loving, loving, loving you  
For everything that you ever do  
Baby, baby, baby, baby, you know what I can do  
Maybe, maybe, maybe, maybe, yeah You, you, ooh, I'm loving, loving, loving you  
For everything that you ever do
