Heaven and Hell

[Tyler and the Tribe](#)

Settle down, is what they want me to do
Find a friend, in a lover like you
Well I ain't wild, just a little upset
Their ignorance makes it hard to forget
But if they just knew one thingMonths of lonely nights and big city lights
With nothing to get me through
Heart break and hope and the things we'll never know
Lead me to leave youAnd I know the things I should do
Ain't the things that I do well
I've got a foot in Heaven
And one in Hell
Look at you, stumblin' through
The Co-ed halls
Beautiful with your black t-shirt
That says "Rock On"Well I ain't wild, but I might just be for the night
It seems like every day is the toughest day of my whole life
Well I can tell you one thing:
It's hard to stay true to what you believe when you've hadMonths of lonely nights and big city
lights
With nothing to get you through
Heart break and hope and the things we'll never know
Lead me to leave youAnd I know the things I should do
Ain't the things that I do well
I've got a foot in Heaven
And one in Hell
clue me in one just one thing
Why's it got to be so hard
To live a normal life day by day...
Well I've had..Months of lonely nights and big city lights
With nothing to get me through
Heart break and hope and the things we'll never know
Lead me to leave youAnd I know the things I should do
Ain't the things that I do well
I've got a foot in Heaven
And one in HellWhoa, yeahh, yeah
