Outside

Foo Fighters

There you are dancing at your altar Beautiful earthling, blessed in Kashmir All your sound echoes through the canyons Down below they're dreaming Hear the sirens screaming Another time, another world Girls were boys and boys were girls Finding glitter in the litter Like a haunt, it's got to move Everybody needs some room There's something out there There's a long straight road, out of the cold And we can leave it all behind I wanna get outside, baby, let's get outside I wanna get outside, outside, of meAll I found, the space between the spaces Standing in the nothing, and time reclaims you And as the wind will beat you down And the wind the only sound There's something out thereThere's a long straight road, out of the cold And we can leave it all behind I wanna get outside, baby, let's get outside I wanna get outside, outside, of me There's a long straight road, out of the cold And we can leave it all behind I wanna get outside, baby, let's get outside I wanna get outside, outside, of me
