Sleep Together

Garbage

I got you crawling up a mountain Hanging round my neck I got you twisted round my finger Crawling round my legs The emptiness, the crazyness Satisfy this hungriness Darling, how would it feel? If we sleep together, will you like me better If we come together, we'll go down forever If we sleep together, will I like you better If we come together, prove it now or never Make me a pretty person Make me feel like I belong Make me hard and make me happy Make me beautiful The emptiness, the crazyness Satisfy this hungriness Darling, how would it feel? If we sleep together, will you like me better If we come together, we'll go down forever If we sleep together, will I like you better If we come together, prove it now or never (If we sleep together) Nothing satisfies me baby (If we sleep together) I wear something pretty baby (If we sleep together) Give me what I crave now baby
