## **Come Into My Head**

## **Kimbra**

It's no use we're gonna have to fight You're throwing words one thousand times Like a child who can't empathize I'm gon' speak along but you don't read my signs You wanna know what I really think You wanna know what I really believe There's a fire burning up in here See the smoke coming out of my ears Trouble's gonna find us, we're all alone I wanna show you what I really mean But you're always on the outside looking in Oh boy, come into my head Come inside ride out in my head Oh boy, come into my head I just wanna have you looking around, hey! I'll throw my hands on your binoculars And every time you get shocked you learn What it's like to be in my dimension I'll be the center of your attention Listen to what it says I do The quiet parts and the crack in my style Come live in its cavity Trouble's gonna find us, we're all alone I wanna show you what I really mean But you're always on the outside looking in Oh want a piece of my brain? Exotic and erotic at the drop of a dime Oh want a piece of my brain? Ecstatic and dramatic at the same time Oh want a piece of my brain? Exotic and erotic at the drop of a dime Oh want a piece of my mind? Da Da-la-da da-la-da da-la-da Da-la-da da-la-da da-la-da Ha-la-da da-la-ha da-la-da Like a blood running through my veins It's my DNA and my chemistry From the pews of the congregation Now I'll never know the real salvation You wanna know what I really mean baby You wanna know what I really need

There's a fire burning up in here See the smoke coming out of my ears Oh want a piece of my brain? Exotic and erotic at the same time Oh want a piece of my brain? Ecstatic and dramatic at the drop of a dime Oh want a piece of my mind? Da Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
