

# Time

## Rexx Life Raj

[Intro]

Ooo-oh, ooo-oh

But now I'm working on this way of life

Ooo-woah-oh

Damn [?][Hook]

I wish I had more time in the day, uh

Just know if I had it my way, yeah

You would priority, not sacrifice

But right now I'm caught up in this way of life, way of life, way of life

To make sure that my future right, future right, future right

Hold me down and pay off coming, ooo-woah, yeah, yeah, uh

[Verse 1]

Why I always feel like I'm on a time limit

Fuckin' moonlight all my bidness

Studio, I spend a night in it

Only thing seem to keep my attention

Pop a kidney, still workin' backwards

Wish I was doctor, fuck a rapper

Thought he was good when he beat the cancer

He was sick afterwards, I thought that was standard

Sometimes I wonder the fuck am I prayin' for?

My momma hate, I question the lord

There's a higher power, I believe in that

I question where he put that evil at

Why I be tragedy, where all my people at?

When we the main ones in the churches

Tithes and offerin' on your car payment, while the pastor's Mercedes Benz swervin', damn

[Bridge]

But maybe I think too much, uh

Maybe I close my eyes and I dream too much

I just can't be gullible, girl I've seen too much

But I don't wanna lose you though 'cause you mean too much[Hook]

I wish I had more time in the day

Just know if I had it my way, yeah

You would priority, not sacrifice

But right now I'm working on this way of life, way of life, way of life

To make sure that my future right, future right, future right

Just hold me down, the pay off coming

The pay off coming[Verse 2]

3 years, it's been up and down

First I'm here then I'm not around

At your house and I'm on the road

In your bed and then in my mode  
In my head I spend hella time  
Hella time you be on my mind  
Wish I could strengthen what we develop  
But I sacrifice for that bottom line  
It be push and pull on the balance beam  
Tight rope, but I don't slip  
Finish line like a million miles  
I just hold it down for the road trip  
I love your patience (I love your patience)  
It's workin' on me now, it's contagious (on me it's contagious, yeah)  
Might go to Cuba and take a vacation  
Get a lil' private beach so you can be naked (we can be naked)  
I would do that no hesitation, oh-woah-woah  
Wish I could give you everything in your imagination  
Wouldn't that be amazing[Bridge]  
But maybe I think too much, uh  
Maybe I close my eyes and I dream too much  
I just can't be gullible, girl I've seen too much  
But I don't wanna lose you though 'cause you mean too much[Hook]  
I wish I had more time in the day  
Just know if I had it my way, uh  
You would priority, not sacrifice  
But right now I'm caught up in this way of life, way of life, way of life  
To make sure that my future right, future right, future right  
Just hold me down, the pay off coming  
The pay off coming[Outro]  
I'm caught up in this way of life, way of life, way of life  
To make sure that my future right, future right, future right  
The pay
