

# River (Acoustic Version)

## Lights

Out across cities, I see buildings turn into piles  
and watch the world in wonder as mountains turn into tiles  
and trees loosing their leaves and their faces becoming tired  
I wish I could discover something that doesn't expire  
Come stumble me Take me river, carry me far  
Lead me river, like a mother  
Take me over to some other unknown  
Put me in the undertow  
Such other things that make a kingdom rumble and shatter  
The same dynamic that another day would never matter  
It really just depends on who's giving and who's receiving  
and things that don't make sense are always a little deceiving  
Come and stumble me Take me river, carry me far  
Lead me river, like a mother  
Take me over to some other unknown  
Put me in the undertow I wanna go where you're going  
A follower, following  
Changing, but never changed  
Claiming, but never claimed Take me river, carry me far  
Lead me river, like a mother  
Take me over to some other unknown  
Put me in the undertow  
Take me river, carry me far  
Lead me river, like a mother  
Take me over to some other unknown  
Put me in the undertow
