

# Clones

## Ash

Now you're a clone  
With heart of stone  
Synthetic soul  
Brainwashed and cold You're just a drone  
Got no control  
Forced in a mold  
Processed and sold Hey!  
You know I find it frightening  
How you change just as fast as lightning You fell from grace  
Leaving no trace  
You've been replaced  
Your name erased  
Hey!  
It's your self-destruction  
You never listened to my instruction Shame, shame, shame, shame Shame  
That everyone's the same  
I thought you stood alone  
We're different from the clones You were a flash of light  
A meteorite  
Unique in time  
Now outta sight For I have seen  
What could've been  
I've had a dream  
A prophecy  
Hey!  
Now there's no use waiting  
Everything is disintegrating Shame  
That everyone's the same  
I thought you stood alone  
We're different from the clones I thought you were the truth  
Exception to the rule  
But the truth is cruel Clones, clones, clones, clones  
Clones, clones, clones, clones Yeah! Hey!  
Now there's no use waiting  
Everything is disintegrating Shame  
That everyone's the same  
I thought you stood alone  
We're different from the clones I thought you were the truth  
Exception to the rule  
But the truth is cruel
