Life Can't Get Much Better

Good Charlotte

One promise we made it

We said we'd never break it

Don't look down, be honest

Tell me, has it changed?One life that we're living

We're somewhere unforgiven

Don't look down, be real now

Tell me, has it changed? I just want to see you laugh again

Life can't get much better

Let's just stay together

These scars are tokens of promises broken

Life can't get much better

Let's just stay forever

We've got to hold on, we've waited so long

If I knew we'd end up this way

Do you really think I wouldn't have tried?

If I knew it would break us down

Do you really think I would've lied? Now I try to forget the past

But it's all that's on my mind

I'd give it all if I could get you back

I'd give it all if you were mineI just want to see you here sometime

'Cause life can't get much better

Let's just stay together

These scars are tokens of promises broken

Life can't get much better

Let's just stay forever

We've got to hold on, we've waited so long

Don't give up on us, on us

Don't give up on us, yeah

Tell me that you meant

Every word you said

In the text you sent, I was going to bed

The girl with the blue eyes

With the blue eyes

It ain't right, it was fucking with me last nightLife can't get much better

Let's just stay together

These scars are tokens of promises broken

Life can't get much better

Let's just stay forever

We've got to hold on, we've waited so longTell me that you meant

Every word you said

In the text you sent, I was going to bed

The girl with the blue eyes

With the blue eyes It ain't right, it was fucking with me last nightLife can't get much better Let's just stay together These scars are tokens of promises broken
