## White Lines & Red Lights

## **Between the Trees**

Late night, driving home together And at red lights we press our lips together And we're holding tight now Slow it down now Let's take our time Let the moment last Until it feels right Holding back And not getting to carried away Let the music fade Cause you are the brightest star I'm in love with who you are And you are the brightest star I'm lost without your loveWe are in each others arms Just like a movie scene Cause as we're leaning in The light decides to turn green Me and you together This is getting better Just butterflies won't do I don't want just red lights I want more of these nights Baby I love you Cause you are the brightest star I'm in love with who you are And you are the brightest star I'm lost without your loveYou and me is what matters most It's not the intimacy that brings me Closer to you...
