

# Body

## The Foreign Exchange

Winter's cold has made a mess of me  
Nowhere to go and there's nothing on these streets  
Need that girl, baby you could stay the night  
And hold her close cause I'd rather stay inside, inside you I don't wanna go out to no club tonight  
I just want your body  
And if I can't have your love right here all to myself  
I don't want nobody Looking forward to time we spend alone  
There in your arms is the place I call home  
That feeling comes when you pull me close  
Hips swaying 'til our heartbeat is one  
I want that love  
For everything you are [?]  
You take the time when I'm in need  
You keep me satisfied you turn me on  
So let's just stay inside
