

Window Seat

Thomston & Wafia

I call you names inside my head
But I tell you it's okay
And when I meet you in that place we know
I lose everything I should say Give me a window seat
I know the glass can keep me safe
You missed your window
When you promised you would change Give me a window seat
And I'll watch you as I drive away
I want to see your face
When you beg for me to stay Boy you got me paralyzed from the waist up
Got so much to say but it's better to run
Cause all the words wouldn't be enough
You always liked to speak for both of us
I carved your name beside my bed
Because I don't like it when you are far
But how can you make this all about yourself
When you're so comfortable where you are I gave you a window seat
I knew the glass would keep you safe
I missed my window
When I promised I would change Gave you a window seat
And I'll watch you as you drive away
Tell me you'll face me when I beg for you to stay Boy you got me paralyzed from the waist up
Got so much to say but it's better to run
Cause all the words wouldn't be enough
You always liked to speak for both of us
Give me a window seat
I know the glass can keep me safe
I missed my window
When I promised I would change Gave you a window seat
And I'll watch you as you drive away
I want to see your face when you beg for me to stay Boy you got me paralyzed from the waist up
Got so much to say but it's better to run
Cause all the words wouldn't be enough
You always liked to speak for both of us
