

# Have It All

## MAGIC!

It's a mystery, our destiny  
Like a caveman and technology  
Like an alien from outer space  
Are they really green?  
We'll find out one day So you and me don't have to  
You and me don't have to  
You and me don't have to know it all  
As long as we can stay true  
As long as we can stay true  
As long as we can stay true  
As long as love don't change  
We can have it all  
Misunderstood, the human heart  
It can fill you up, it can fall apart  
So I will try with every beat  
To love you with the best of me So you and me don't have to  
You and me don't have to  
You and me don't have to know it all  
As long as we can stay true  
As long as we can stay true  
As long as we can stay true  
As long as love don't change  
We can have it all It's a mystery, our destiny  
Like a caveman and technology  
So you and me don't have to  
You and me don't have to  
You and me don't have to know it all  
As long as we can stay true  
As long as we can stay true  
As long as we can stay true  
As long as love don't change  
We can have it all
