

Shots Fired

Rick Ross

Slow down

I just heard a bunch of gunshots go off -- my sibling just left on her bike to go -- Oh my God,
they're turning around and coming back

Okay

I'm hanging up, I'm hiding, bye--

Okay, m'am, how many shots did you hear?

I don't know, I don't know, but they're coming back.

I'm hiding

We're being told by people here on the scenes, specifically the manager that a famous rapper
was riding in that car when someone opened fire shooting at that car, that car crashing into that
building.

Police cleaning up the shell-casing markings that were here just a few moments ago.

This is still under investigation"

There was a rapidfire 9 or 10, 9 or 10 shots.

You know, rapidfire with rapid succession and odd enough it wasn't a handgun, it was some
kind of a rifle."

Police have leads, but no strong description of the shooter or the shooters who appeared to have
targetted South Florida based rapper Rick Ross as he drove down the street"
