

# Riot (feat. Damian Jr. Gong Marley)

Sean Paul

Well at least give me the light to bust some of the young fo'  
And a welcome, we put the jam and feature every stage show  
Pretend to put all the creator yea yea they know  
Be honest on the cricket strictics, just be gone()  
I want to give me the light, they know it's about to give that man a reason to love  
They might look for mine, the mind's with them like and I work them with love  
I'm elected and protected by the chief of staff  
So make them get this through the bass, trip these small clouds()  
As she knew heaven is enlighten, don't surprise it then line all in a chop  
If it up them light then watch all the move and I know them on top  
With the lion I'm with, I know that thing's say no tough, no puff  
If there's something in my grove then something I might lose then why not that top?

Back up when I'm in here, gonna go when I'm in charge  
Don't go before you say, pretend that you are notion  
The prophet aye acceptable, the use not too lot  
Gearing up the mic and let the riot boy start()  
Put the lion in my Jeep you know with them I'm back  
Let's hurry to the Jeep, let's put on that, move fast  
The keys to the Jeep then I get to it fast  
Hit it, really hit that light and let the riot boy start  
Hit it, really hit that light and let the riot boy start  
Hit it, really hit that light and let the riot boy start  
The riot boy start, the riot boy start  
Hit it, really hit that light and let the riot boy start

Gunzilla, Sean Paul, colder than a cold saw  
No fly, froze yall, work it at the own ya  
Dreadlocks, Mohawk, come on make the roadblock  
Living coast for no shit()

But I would them shine, you know it's pack them things and my boys will block the wall  
And you know ain't no gun, definite them run when I just step on the target  
I'll just be the only outcome, is that them bullshit fowl?  
Them mislead, then ever conceive, them lights burn up the site()  
They like no boy, no diner, fear of money my call  
No dear, no time and I accept no common assault  
No one's know face, I'm a living juggernaut  
Bugs Bunny man and I bid me no water()  
Sense m all, I'm in a move like the wealthy exotic  
I'll be get them trickery, maybe next time  
The prophet aye acceptable, the use not too lot  
Gearing up the mic and let the riot boy start()

Put the lion in my Jeep you know with them I'm back  
Let's hurry to the Jeep, let's put on that, move fast  
The keys to the Jeep then I get to it fast  
Hit it, really hit that light and let the riot boy start  
Hit it, really hit that light and let the riot boy start  
Hit it, really hit that light and let the riot boy start  
The riot boy start, the riot boy start  
Hit it, really hit that light and let the riot boy start
