

Already Gone (feat. Brave & Lido)

[Alison Wonderland](#)

I've been nursing a broken heart
It took so long for me to adjust
So long, so long Two months, laid out
Something breaks my sleep
She showed up at my door
Saying let's not make this hard
But you are You're already gone
Please don't waste my time
You took too long
Love already died
You're already gone
Please don't waste my time
You took too long
Love already died
I remember when you told me
You didn't want me and that you gotta go You're already gone
Now you tell me that you want me
But I'm sorry, look girl, I gotta go
I'm already gone
I've been vibing, life goes on
The places and faces I found a world away from your bullshit
Still you manipulate things
You already broke my heart
Why make it so damn hard to move on
You're already gone
Please don't waste my time
You took too long
Love already died
You're already gone
Please don't waste my time
You took too long
Love already died
You're already gone
Please don't waste my time
You took too long
Love already died
You're already gone
Please don't waste my time
You took too long
Love already died
