Aftertaste

Shawn Mendes

Re-Rewind Friday night never forget it How you let me go No more lies I'll be fine I know where I'm headed Probably should've known Now you're gonna say pretty "please forgive me" Fooled me once, told you twice your gonna regret it Now you're all alone, yeah Turns out that no one can replace me I'm permanent you can't erase me I'll help you remember me One more kiss is all it takes I'll leave you with the memory and the aftertaste Close your eyes you can't hide try to forget me but I'm everywhere I'm the smell on your sheets you will regret it when you left me there Now you're gonna say "pretty please forgive me" yeah Bet it hurts it gets worse you know nobody said it would be fair oh yeah Turns out that no one can replace me I'm permanent you can't erase me I'll help you remember me One more kiss is all it takes I'll leave you with the memory and the aftertasteAnd now there's something in your way Cause you threw it all to waste And you wonder if you can take back what you did that day and it hurts 'cause Turns out that no one can replace me I'm permanent you can't erase me I'll help you remember me One more kiss is all it takes I'll leave you with the memory and the aftertaste Truth is that no one can replace me I'm permanent you can't erase me I'll help you remember me One more kiss is all it takes I'll leave you with the memory and the aftertaste And the aftertaste Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
