

# City Lights

Avicii

City lights, take me your way  
Now it's time we never ever head down  
Don't be scared, I am for real  
Hide our way and we will never be found  
It's alright, we never look back  
Birds will sing if we fall  
It's alright, with memories inside  
Midnight dust on the floor  
Watch it turn into gold  
And I don't even know what's real  
And I don't know what to feel  
I'm your truth in the skies  
I'm in love with your lies  
Cause I can't breathe  
Can't settle down  
And I don't know what to feel  
No I don't know what to feel  
Cities lights we're getting away?  
won't find us when not making a sound  
We're not scared, we are for real  
Love can't hurt us now we are sheltered by lies  
It's alright, we never look back  
Birds will sing if we fall  
It's alright, with memories inside  
Midnight dust on the floor  
Watch it turn into gold  
And I don't even know what's real  
And I don't  
know what to feel  
I'm your truth in the skies  
I'm in love with your lies  
Cause I can't breathe  
Can't settle down  
And I don't know what to feel  
No I don't know what to feel
