

# Heartbeat

## Carrie Underwood

I love it when we're at a party  
In a downtown crowd, oh  
But I can't hear you call me baby  
With the music up loud  
Red wine, good times  
No, I don't mind being with everyone else  
And then there's nights like tonight that I  
I want you to myself And tonight I wanna drive so far  
We'll only find static on the radio  
And we can't see those city lights  
And I love the way you look in the firefly glow  
Saying everything without making a sound  
A cricket choir in the background  
Underneath the harvest moon  
Standing on your shoes in my bare feet  
Dancing to the rhythm of your heartbeat  
Oh, and we're dancing to the rhythm of your heartbeat I wanna feel it like a kick drum  
Beating faster in your chest  
I wanna feel you holding onto me  
And make me hold my breath  
You pull me closer, my head on your shoulder  
Baby, we won't need a song  
We'll make a falling star wish  
One more slow kiss  
What are we waiting on?  
And tonight I wanna drive so far  
We'll only find static on the radio. Ooooh  
And we can't see those city lights  
And I love the way you look in the firefly glow  
Saying everything without making a sound  
A cricket choir in the background  
Underneath the harvest moon  
Standing on your shoes in my bare feet  
Dancing to the rhythm of your heartbeat  
Yeah, we're dancing to the rhythm of your heartbeat  
I wanna feel it like a kick drum  
Beating faster in your chest And tonight I wanna drive so far  
We'll only find static on the radio  
And we can't see those city lights  
And I love the way you look in the firefly glow  
Saying everything without making a sound  
With a river rolling in the background

Underneath the harvest moon  
Standing on your shoes in my bare feet  
Dancing to the rhythm of your heartbeat  
And we're dancing to the rhythm of your heartbeat, oh
