## XXXTENTACION

The pain in my heart just won't end  
The words that I find just don't seem to compare  
Waiting til' my death and the end  
Alone, I must seek out the end to begin  
So nobody wants death  
'Cause nobody wants life to end  
I'm the only one stressed  
I'm the only one tired of having fake friends  
Put the noose on my neck and the hole in my back, again  
I've been waiting on death with a smile on my face  
This is the end  
Waste of tears  
Waste of years and months  
Face my fears  
Loving her for what I have  
Hurt me  
Break my heart  
Worthless  
Can't keep love at all  
Spinning, twist myself  
Worthless  
Can't keep love at all  
At all
