

# Alien

## Sabrina Carpenter & Jonas Blue

This feeling's so alien  
Need to know if you're just a friend  
Are you a secret I'm holdin' in So leave it on my brain  
If you feel the same Lie, but I notice it  
Don't know the rules but I got to win  
The paranoia is sinking in  
So leave it on my brain  
If you feel the same Let me discover all of your colors  
If you love me let me know  
No, no, let me discover all of your colors  
If you love me let me know  
Don't let me leave when I'm standing at your door  
Don't make me stop when you're really wanting more  
If you show me what you been thinkin' of  
Let me get inside your mind  
If you show me love, it'll be enough  
It'll be a better night If you love me let me know  
If you love me let me know  
If you love me let me know  
It'll be a better night If you love me let me know  
If you love me let me know  
If you love me let me know  
It'll be a better night  
I alienated them  
Right about when our love began  
Emotions are moving in  
Gettin' in my space  
Livin' in my place  
When did these days begin? I'm overthinking my thoughts again  
No we don't break, but we're bound to bend  
Gettin' in my space  
Livin' in my place Let me discover all of your colors  
If you love me let me know  
No, no, let me discover all of your colors  
If you love me let me know Don't let me leave  
When I'm standing at your door  
Don't make me stop  
When you're really wanting more If you show me what you been thinkin' of  
Let me get inside your mind  
If you show me what, it'll be enough  
It'll be a better night If you love me let me know  
If you love me let me know

If you love me let me know  
It'll be a better night If you love me let me know  
If you love me let me know  
If you love me let me know  
It'll be a better night If you love me let me know  
If you love me let me know  
If you love me let me know  
It'll be a better night If you love me let me know  
If you love me let me know  
If you love me let me know  
It'll be a better night A better night, yeah
