

# Your Star

## Evanescence

I can't see your star  
I can't see your star  
Though I patiently waited bedside for the death of today  
I can't see your star  
The mechanical lights of Lisbon frightened it away  
And I'm alone now  
Me and all I stood for  
we're wandering now  
All in parts and pieces  
swim lonely  
Find your own way out  
I can't see your star I can't see your star  
How can the darkness feel so wrong?  
And I'm alone now  
Me and all I stood for  
we're wandering now All in parts and pieces  
swim lonely  
Find your own way out  
So far away  
It's growing colder without your love  
Why can't you feel me calling your name?  
Can't break the silence  
it's breaking me  
All my fears  
turn to rage  
And I'm alone now  
Me and all I stood for  
we're wandering now  
All in parts and pieces  
swim lonely  
Find your own way out now  
Hey, nothing worth fighting for  
We're wandering now  
All in parts and pieces  
swim lonely  
Find your own way out
