

# Heaven Is Here

Helene Fischer

I feel as if my heart could dance  
Up to the stars, ascend  
Where the air is so clear  
You hold me close all through night  
The magic feels so right  
It's like heaven is here I see a rainbow in in the sky  
And though it's dark outside  
You taught me how  
Each time I know that you are near  
It's like heaven is here  
And I - I know that this is where I've never been  
Now it's so clear  
I fly on clouds upon the the wind  
It's like heaven is here  
And I - I found your hand though I couldn't understand  
How close, how near  
The day you came into my life  
It's like heaven is here Now I woke up from my pain  
And I could breathe again  
All my senses were there  
I'm through with wearing only black  
My laughter has come back  
Because heaven is here  
Now you're my lighthouse in the dark  
Just like the missing part  
That I so need  
Since I surrendered all my fears  
It's like heaven is here And I - I know that this is where I've never been  
Now it's so clear  
I fly on clouds upon the the wind  
It's like heaven is here  
And I - I found your hand though I couldn't understand  
How close, how near  
The day you came into my life  
It's like heaven is here  
And I - I know that this is where I've never been  
Now it's so clear  
I fly on clouds upon the the wind  
It's like heaven is here  
And I - I found your hand though I couldn't understand  
How close, how near  
The day you came into my life

It's like heaven is here

It's like heaven is here
