

Show Me a Sign

Modestep

This is for the ones who care
The ones who listened all the way there
This one's for you, now show me a sign This is for the ones who care
Ignoring all the bad that's been said
This one's for you, now show me a sign Someone raise a lights up
Light up the sky above
If you're with me now show me a sign Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign
(put your f*ckin lights up) This is for the ones who care
This is for the ones who care
This is for the ones who care
This is for the ones who care Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign (put your f*ckin lights up) Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign
Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign (put your f*ckin lights up)
