

Wait for Me

It's like everything turns into a dream
A dream without an end
I can't remember what happened
I just remember you
And how you made me laugh out loud
When you decided to go,
I wish I could have gone with you
I don't like it here anymore
And I don't like being alone
And when I cry,
Who's going to make it okay?
When I fall, who's going to carry me?
(tell me what I've done.
Tell me what I've done.
Tell me what I've done.
Tell me what I've done.)
WHYYYYYYYYY!
Take me now and climb to fly
To a higher place where love won't die
We've got something to say without a sound
Tell me what, tell me what are we gonna do now? Lay yourselves under ground
Tell me what are we gonna do now?
Lay yourselves under ground
Now tell me what's happening to me?
I know something is killing you
Take my life,
Sliding into the blue now
I know something is killing me
Take your life,
I am waiting for you
You.
Wait for me.
I'm alive because I'm dying with you
Wait for me.
I'm alive and I am dying with you Break away to emergency
You're taking hearts are flying with me
I believe what you say, so say it loud
Tell me what, tell me what are we gonna do now? Lay yourselves under ground
Tell me what are we gonna do now?
Lay yourselves under ground
Now tell me what's happening to me?

I know something is killing you
Take my life,
I am counting on you now.
I know something is killing me
Take your life,
I am waiting for you
You.Wait for me.
I'm alive because I'm dying with you
Wait for me.
I'm alive and I am dying with youEverything is so beautiful here
It's just like you promisedA whole new world begins with you
A whole new world
