

You and Me (feat. B-Case & U-Jean)

DJ Antoine & Mad Mark

i was coming down from a fever at least that's how it felt today i didn't want to believe her
there's nothing left to say we had days where we were together spending time that i can't forget!
can we go on make it last forever?

or shall we call it dead?

when the lights go out what is left between you & me you & me when the time runs out what is
left between you & me you & me baby, can we work it out what is left between you & me what
is left between you & me?

what is left between you & me you & me turn all the bright light on!

turn all the bright lights on on on!

turn all the bright lights on!

turn all the bright lights on on on!

last night i thought i seen her and then i watched it fade away i wish i never would've met her
then i'd never feel this pain

i still remember when we were together spending time that i can't forget couldn't we make it
last forever but she just called it dead when the lights go out what is left between you & me you
& me when the time runs out what is left between you & me you & me baby, can we work it
out?

what is left between you & me you & me what is left between you & me what is left between
you & me?

turn all the bright light on!

turn all the bright lights on on on!

turn all the bright lights on!
