

Me and You

Saving Abel

When it all comes down to me and you
We're all hiding a little lie under the truth
Maybe we should take our time, there's nothing to lose
'Cause it all comes down to me and you Before I let you know know know
I will never let you go go go
Thinkin' you have loved any time, any place anymore
I guess I should've learned learned learned
I could've got burned burned burned
Kinda feels like I've been here before When it all comes down to me and you
We're all hiding a little lie under the truth
Maybe we should take our time, there's nothing to lose
'Cause it all comes down to me and you
It's just another kiss goodbye
Just another reason why
Can't run every time everyone says everything's gone wrong
'Cause I won't let you get away
I won't let your arms down me
No use pretendin' anymore Baby, when it all comes down to me and you
We're all hiding a little lie under the truth
Maybe we should take our time, there's nothing to lose
'Cause it all comes down to me and you When life is hard, when life is hard
And we can't miss all, we can't miss all When it all comes down to me and you, yaaa When it all
comes down to me and you
We're all hiding a little lie under the truth
Maybe we should take our time, there's nothing to lose
'Cause it all comes down.
Baby, when it all comes down to me and you
We're all hiding a little lie under the truth
Maybe we should take our time, there's nothing to lose
'Cause it all comes down to me and you
