

Captain

Frankmusik

Faithful love abandoned
Search for land we're stranded
Storms are slowly moving in
Feel the sun is setting
No point in regretting
We might make it on our own
Cos' we used to know our way back home
We had a lighthouse
But will we know which way to turn
With all the lights out I said whos gonna captain us
I said whos gonna captain us
I said whos gonna navigate Through this hurricane
Sweeping over our fate
You said you'd keep an eye on those rocks
I said I'd keep an eye on those rocks
We said we'd keep an eye on them But we've broken up again Think we need a captain I thought
we had it figured Holding onto triggers Stand off pointing at our heads You held your ground
forever But you lost me not so clever You can drown alone I guess Cos' we used to know our
way back home We had a lighthouse But will we know which way to turn With all the lights out I
said whos gonna captain us
I said whos gonna captain us I said whos gonna navigate Through this hurricane Sweeping over
our fate You said you'd keep an eye on those rocks I said I'd keep an eye on those rocks We said
we'd keep an eye on them But we've broken up again Think we need a captain I see you sinking
over everything we say and do Sos' in you're confessin' it ain't helpin Now we falter in the water I
reach out to you Currents come I don't see you swimming I said whos gonna captain us I said
whos gonna captain us I said whos gonna navigate Through this hurricane Sweeping over our
fate I said whos gonna navigate us Whos gonna navigate us I said whos gonna navigate Through
this hurricane Sweeping over our fate Now we're breaking up again Now we're breaking up
again Now we're breaking up again
