

# Demons

## Silverstein

You've laid down the weapons  
You still spread the disease  
And now you make commitments  
You couldn't possibly keep  
You love playing the victim  
You love the sympathy  
And in your place of solace  
There's never honesty  
Something I need to tell them  
Not that it would change their minds  
You polished your reputation  
They've never seen the other side  
Take off your mask, your faded design  
Break off the chains, your cross to bear  
Shake off the demons left in your mind  
You take them everywhere  
You've got a cross on your forehead  
You crave the people to see  
How you can open up their vaults  
With your skeleton key  
Nothing that you could tell me  
The past could never change my mind  
You built up my expectations  
And let me down every time  
Take off your mask, your faded design  
Break off the chains, your cross to bear  
Shake off the demons left in your mind  
You take them everywhere  
Take off your mask, your faded design  
Break off the chains, your cross to bear  
Shake off the demons left in your mind  
You take them everywhere  
Last year you stole it  
Was broken no reflections  
These words I'm reading  
Paint a thousand pictures  
Take off your mask you're hiding behind  
Shake off the demons left in your mind  
You take them everywhere  
Take off your mask, your faded design  
Break off the chains, your cross to bear  
Shake off the demons left in your mind  
You take them everywhere  
Stop hiding  
With your cross to bear  
Shake off the demons left in your mind  
You take them everywhere
