Just Watch the Fireworks

Jimmy Eat World

Here you can be anything Anything that scares you I think that scares you Here, I've been here before

But only by myself, myselfI promised I'd see it again I promised I'd see this with you nowI promised I'd see it again I promised I'd see this with you nowWhat given up gives you

And where giving up takes you

I've have and I've been

Here in center frame

Here there's only air

And just enough space to fit

I promised I'd see it again

I promised I'd see this with you nowI promised I'd see it again
I promised I'd see this with you nowI said, said, said it out loud over and over
Said, said, said it out loud but what do I know
Said, said it out loud over and overI said, said it out loud over and over

Said, said, said it out loud but it did not help

I'll stop now just so I can hear you

I stay up as late as it takesI promised I'd see it again I promised I'd see this with you nowI promised I'd see it again

I promised I'd see this with you now
I said, said, said it out loud over and over
Said, said, said it out loud but it did not help

I'll stop now just enough so I can hear you

I stay up as late as it takesI stay up as late as it takes

I stay up as late as it takesAs long as it takes

As long as it takes

As long as it takes I stay up as late as it takes
As long it takes
