Life of the Party

The Weeknd

Welcome to the other side

You're lost

Baby step outside your mind

You've been really good

You've been really good

You've been thinking bout being bad ever since I put you on

She got money for blow

Just check her damn nosePrescription ain't an issue

You can mix it with the uh

And if you wanna do it, baby

I'm right here with you

I'm on cloud 9

Baby you're behind

You can follow me

You can follow me if you want

To go downtown with the drugs in your body

Take that step you're the life of the party

Know that step you're the life of the partyI got 2 little ladies

I got 1 little room

There's a room full of niggas

Baby what you wanna do?

The way you move got me feeling so uhh

I been thinking about it baby

I been thinking about it latelyI'm so far gone and you are too

Show me how you go downtown

With the drugs in your body

Take that step, you're the life of the party

Know that step, you're the life of the party

I love how you touch

How you feel

How you breath

Baby how you do it so goodHow you twist with your hips got the room so slow baby

Girl please don't go

You're gonna please my boys

You been thinking about it babyYea you're a star

Oh you Knocked one down

Yeah you knocked one down

Girl, there's 123

Go downtown with the drugs in your body

Take that step you're the life of the party

Know that step you're the life of the party
