

Taxis

[Amanda Bergman](#)

Come, let's go then, taxi's waiting
You look golden, I look fading
Come next morning, take you out again
You keep mourning, I keep waiting
We saw the same birds, from the same address
We kept startling, kept them going places
Dance with me somewhere now, dance with me
somewhere now
Oh, I almost had the chance we should tuck it in
Feel we used to spin and its pounding still
We don't have to fight, we could never win
New addresses, shoes you'll never see
Tell the people, I'm going where I am
So take your bags and, leave them by the stairs
Find your shelter, find it anywhere else
Dance with me somewhere now, dance with me somewhere now
Oh, almost had the chance we should tuck it in
Feel we used to spin and it's pounding still
We don't have to fight, we could never win
Won't you dance with me somewhere now, dance
with me somewhere now, won't you dance with me somewhere now, dance with me
somewhere now
