## **Clouds**

## **David Nail**

Well, the turn signal's clicking
And the seconds are slipping away
Just a little bit more of this turnpike
And so much to sayThe airport traffic, it slows us to a still
I turn the radio down
And leave one hand on the wheelWell I don't know what to tell you

What do you wanna hear You see, guys like me, we just disappear

You deserve someone who will never leave

But, girl, the last few days are the best we'll ever beIsn't every goodbye a chance to become

A bittersweet memory for someone Don't you ever look back with regret

Share with me a moment for all time

In a corner of your mindIf you've never seen New England in the fall

Should you find yourself up there, give me a call

But before I make my way into the crowd

Could I share one last kiss while we're still in the cloudsIsn't every goodbye a chance to become

A bittersweet memory for someone Don't you ever look back with regret

Share with me a moment for all time

In a corner of your mind

Isn't every goodbye a chance to become

A bittersweet memory for someone

Don't you ever look back with regret

Share with me a moment for all time

In a corner of your mindIn a corner of your mind
