

The Bottom

Staind

You suffocate, you cannot wait
For this to just be over
You wanna run and just be done
But what you can't control is Don't know what you're thinking
The ship is sinking I'll meet you at the bottom
The waves can't wash away all the scars you bear
See you at the bottom
You just hold on to the things that keep you there You suffer the cost when all this is lost
It just doesn't make sense to go there
All the hate that you fear, it slowly appears
Back into your life, no controlling
Don't know what you're thinking
The ship is sinking I'll meet you at the bottom
The waves can't wash away all the scars you bear
See you at the bottom
You just hold on to the things that keep you there Fight
Just fucking stand for something
Lie
You'll never take us all You'll never get it right
You'll never get it right
We'll always stand and fight
You'll never get it right It's cold down here at the bottom
I'll meet you at the bottom
The waves can't wash all the scars you bear
See you at the bottom
You just hold on to the things that keep you there
