

# Black Balloon

## The Kills

Elevator straight into my skull  
The escalator rises as it falls  
I swear our jet is crashing in my mind  
You can hold on but I wouldn't waste your time Farewell my black balloon  
Farewell my black balloon I've stood in a thousand street scenes  
Just around the corner from you  
On the edge of a dream that you have  
Has anybody ever told you it's not coming true  
Farewell my black balloon  
Farewell my black balloon  
The weather had its way with you  
Farewell my black balloon  
The weather had its way with you  
Farewell my black balloon
