## **One More Time (feat. Chante Moore)**

## Kenny G

I lie half awake Late at night I reach out to touch you To feel you by my side And I reach And I reach But I never get to feel you Will I ever get to feel you again? Again... Just one more time One more moment To take you in my arms One more chance One more kiss Before I wake to find you gone One more time Before I have to face another day And my heart breaks... againIt's only a dream But it's also real I don't want it to end But I know it will So I pray and I pray Every night I'm on my knees Begging for the chance to see you again Again' Just one more time One more moment To take you in my arms One more chance One more kiss Before I wake to find you gone One more time Before I have to face another day And my heart breaks... again Again...
