

# I Don't Wanna Waste My Time

Joji

I don't wanna waste my time if I can't be by your side  
You really shouldn't think about that if she can't see where you hide  
We don't gotta talk about nothing nice if you wanna come down  
But she don't gotta know 'bout nothing  
But she don't gotta know And if the stars collide, will she relieve my soul?  
And when we feel alive I know she'll let me go  
When you read my lips, I know you feel all cold  
But I promise you my heart is made of gold I don't wanna waste my time if I can't make you  
decide  
You're only on my mind when I need you  
I don't need to know about what you do when the sun goes down  
Cause I don't gotta know about nothing  
Cause I don't gotta know  
And if the stars collide, then she will leave my soul  
When we feel alive I know she'll let me go  
When you read my lips, I know you feel my cold  
But I promise you my heart is made of gold
