Dead Roses

Sevendust

Beg and pleading Why don't you feed another lie You can climb all your fences But nothing's gonna keep you high (So far nothing's working) Nothing's working (I've seen love die) It's falling outHate your beautiful way We live in your game Your days getting closer And all love completely erased We run from the plague That you keep right beside you So close to you Just give me the feeling Something that'll take me on a ride To all the familiar places But still a good place to hide (So long, nothings worth it) So not worth it (I scream, you try) To hold me downHate your beautiful way We live in your game Your days getting closer (Closer! Closer!) And all love completely erased We run from the plague That you keep right beside you So close to you Hate your beautiful way We live in your game Your days getting closer (Closer! Closer!) And all love completely erased We run from the plague That you keep right beside youHate your beautiful way We live in your game Your days getting closer (Closer! Closer!) And all love completely erased We run from the plague

That you keep right beside you

So close to you (So close to you!)
