

# Fools

Lauren Aquilina

Those hardest to love need it most  
I watched our bodies turn to ghosts  
Such good friends, it has to end it always does  
That's the way life is  
Do we take that risk? And so it all boils down to this  
We've got our aim but we might miss  
We are too fragile just to guess  
And I've been in this place before  
Fine as we are but we want more  
That's human nature at its best What if we ruin it all, and we love like fools?  
And all we have we lose?  
I don't want you to go but I want you so  
So tell me what we choose  
Friends, I watched us as we changed  
The feelings in my headspace rearranged  
I want you more than I've wanted anyone  
Isn't that dangerous? The anticipation before the kiss  
Mirrored in my shaking lips  
Oh god I feel so unprepared  
The two of us so out of place  
My feelings written on my face  
Got what I want but now I'm scared What if we ruin it all, and we love like fools?  
And all we have we lose?  
I don't want you to go but I want you so  
So tell me what  
Tell me what we choose  
What we choose  
What we choose  
What if we ruin it all, and we love like fools?  
And all we have we lose?  
I don't want you to go but I want you so  
So tell me what  
Tell me what  
Tell me what we choose
