

Best Friend

Candlebox

Quiet down now, hush hush my friend
Quiet down now, hush hush my friend
When all the others left, when all the others left
When all the others left, when all the others...
I know you'd stick around, come here now
I know you'd stick around, come here now
When all the others talked, when all the others talked
When all the others talked, when all the others...
You'd always been my habit now
Colored bees, and stomach aches,
Your friend's in need, and lovers quakes
My best friend, my, my very best friend,
My best friend, my, she never left my side
So come here now sit. Quiet down. Come here now sit
Quiet down now, quiet down friend...
When all the others left, when all the others left
When all the others left, when all the others...
I knew you'd stick around, come here now
When all the others talked, when all the others talked,
When all the others talked, when all the others...
You'd always been my habit now
Colored bees, and stomach aches,
Your friend's in need, and lovers quakes
My best friend, my, my very best friend,
My best friend, my, she never left my side
So come here now sit. Quiet down. Come here now sit.
So lie down now, quiet down friend
Lie down now, lie down now sit
My side so lie down and fight to find,
My side so lie down and fight for my,
My side so lie down, be good for my,
My side so lie down, be good for my,
Quiet down now, hush hush my friend
Come here now, come here now sit
When all the others left, I knew you'd stick around
When all the others talked, I knew you'd stick around
Lie down now, lie down my friend
Lie down now, hush hush my friend
My best friend, my, my very best friend
My best friend, my, my very best friend
