

Sea of Machines

[Ayreon](#)

The 'Frame is running all our systems, no way to shut it down
Outcries of panic in the distance, fear... all around
No satellites, no radio, no TV, I can't even
use my phone

We need to wake up from this bad dream, we're not alone!
I've seen the future in a dream
I've seen a sea of machines

I've seen a realm beneath the waves
Another time, another space
The 'Frame is closing all the channels, isolated from the world
But there's still time to heal the damage and lift this curse
You need to reach beyond your fear
You need to stand your ground and fight

If we're to make it out of here
If we're to leave Alpha alive
I can sail us to the skies
I can fly us to the stars
I won't allow our race to die
I'll never leave you in the dark
I'll find a way to save our kind
After all I am to blame

Just follow me, and I will guide
And I'll release us from the 'Frame
The 'Frame is cutting off the power, we're stranded in the
dark
It won't help to hide away like cowards, make a brand new start!

I see a comet cleave the sky
In a time beyond time
I see a realm beneath the waves
I see a castle, a castle deep in space
On the edge of time!
