

True Love

Glenn Frey

Out of the blue, out of the night
You came along and you changed my life
I'm feeling things I swear I've never felt before, yes I am, baby
You looked at me; that's all it took
You read my heart like an open book And it was true love right from the start
It was true love straight from my heart
It was true love, ain't no doubt about it, baby
True love, I can't live without it Before I met you baby, I was alone
Thought I was happy livin' on my own
But now I realize this world was made for two, like me and you
With you by my side, everything's fine
There ain't no mountain, sugar, we can't climb
We got a true love, that's all we need
Is a true love; it's got a lifetime guarantee
It's a true love, so hard to find, babe
True love, put your heart on the line now True love makes every day a little brighter
True love makes every burden just a little lighter
True love will make you be a better man
If you had true love, you'd understand Out of the blue, out of the night
You came along and you changed my life
You've got me feeling things I swear I've never felt before
You lift me up; you make me strong
You give me lovin' lastin' all night long Well, it's a true love right from the start
It's a true love comin' straight from my heart
True love, need you here beside me baby
True love, need your love to guide me
True love, I can't deny this feelin', no, no matter how hard I try
I just know what I feel
And it's a true love She's my baby; she's my girl
She changed my life, oh, she changed my world
She's my buttercup, oh, fill me up, woo-hoo, yeah
Talkin' about love, talkin' about love, it's gotta be a true love GLENN FREY
