

# When Love Is Dying

Elton John & Leon Russell

They say we bruise too easily  
I don't know if that's the way for me  
I've seen 'em come, I've seen 'em go  
I've seen everyone I know  
Fall in and out of love  
It's just the way it goes Word is out, silence seems so loud  
There's no light above or below me now  
I've seen it grow, I've seen it live  
I've seen everything I give  
Falling out my hands  
No matter who I'm with  
And nobody ever tells you  
When love is dying, when love is dying  
It just gets a little colder  
And we stop trying, we stop trying  
Yeah, we stop trying  
Oh, when love is dying There's a pain you never can explain  
It cuts so deep, time and time again  
I felt it then, I feel it now  
But nobody told me how  
To fight a world of hurt  
Somebody help me now And nobody ever tells you  
When love is dying, when love is dying  
It just gets a little colder  
And we stop trying, we stop trying  
Yeah, we stop trying  
Oh, when love is dying  
But love never gets to show you  
And I never got to know you  
No, we never stood a chance  
When love was dying No, and love never makes it easy  
And I've never got that feeling  
No, we never stood a chance  
When love was dying Nobody ever tells you  
When love is dying, when love is dying  
It just gets a little colder  
And we stop trying, we stop trying  
Yeah, we stop trying  
Oh, when love is dying Oh, when love is dying
