

# Open Your Heart

DJ Bobo

Open your heart  
Even when you're far away  
You're on my mind every night and day  
You're the one for me we'll never part  
Stay with me and open your heart  
Don't let the sun go down on me  
Open your heart  
Just let me be your destiny  
Open your heart  
What I never felt before  
I really need you more and more  
Don't let the sun go down on me  
Open your heart open your heart  
Open your heart  
Open your heart  
Your style is magic you hypnotise me  
You came into my life set me free  
Life and energy all around the galaxy  
Made it bright so that I can see  
Like a melody in XTC  
See our love will last eternaly  
Seems that your life is a golden key  
Don't let the sun go down on me  
I can't express what's going on  
I feel so lonely when you're gone  
You're the one for me we'll never part  
Stay with me and open your heart  
Don't let the sun go down on me  
Open your heart  
Just let me be your destiny  
Open your heart  
What I never felt before  
I really need you more and more  
Don't let the sun go down on me  
Open your heart open your heart  
I need you don't let the sun go down on me  
Call me let me be your destiny  
See you got the key to my heart  
We'll never part from the start till the end of time  
You're always mine take a glass of wine  
And let the sun shine find out  
What's right or wrong what's going on

I feel lonely when you're gone  
Even when you're far away  
You're on my mind every night and day  
You're the one for me we'll never part  
Stay with me and open your heart  
Don't let the sun go down on me  
Open your heart  
Just let me be your destiny  
Open your heart  
What I never felt before  
I really need you more and more  
Don't let the sun go down on me  
Open your heart open your heart  
Open your heart
