They Know Nothing About Us

Basia

right from the start there was none who had faith in us who believed two of us had a chance many years precious scars we survived we are strongerthey don't know about us they know nothing about us they don't understand they know nothing about us they don't know about us they know nothing about us no, nothing about us they don't get our love wish we could be somewhere else where they wish us well where the people are happy for us just imagine how far we could go what we could do
