## I See Stars

You won't see me die here  
You always say I need to get  
As far away as I can  
While I've got time to play with  
And any risk, I'll take it  
Or fade away in this suburban wasteland  
And watch all your plans  
Sink right under your feet  
Sink right under your feet  
Watch all your plans  
Sink right under your feet  
Under your feet is the ground to break  
You only get what you take  
So don't just sit and watch the atrophy of it  
I have stood back for way too long  
You are broken, you are so broken  
I can see that we may be running out of time  
The curtain's falling in slow motion  
I can feel that the sense has left your mind  
The curtain's falling in slow motion  
Why did you go, I can't watch  
So quiet and peaceful  
Where did I go wrong  
Say you can stay, I can't look away  
You won't see me die here  
You won't see me die here  
Now! Now! Do you hear me now!  
Screaming at the top of my lungs all night  
Now! Now! Do you hear me now!  
Screaming at the top of my lungs all night  
Why? Why? Ask me why?  
Go ahead and act like you don't know why!  
Why? Why? Ask me why?  
I'll scream it, you blow me away  
You blow me away, you blow me away  
Can you give me my  
breathe back?  
Can you give me my breathe back?  
Can you give me my breathe back?  
Can you give me my breathe back?  
Do you hear me now!  
Screaming at the top of my lungs all night  
Do you hear me now!  
Screaming at the top of my lungs all night  
Do you hear me now!
