Atmosphere

Kaskade

When I was young I would stand alone With visions of worlds that were all my own The lights in the sky weren't that far away Living in the vastness of outer spaceAll my life I've been a star Holding a light up in the dark While I try to keep clear Of all the waves in your atmosphereAll my life I've been a star Holding a light up in the dark While I try to keep clear Of all the waves in your atmosphereOf all the waves in your atmosphereOf all the waves in your atmosphereWhen I was young I could hear the sound A melody pure and a rhythm loud Oh, this sound took me away Carried through the vastness of outer space All my life I've been a star Holding a light up in the dark While I try to keep clear Of all the waves in your atmosphere All my life I've been a star Holding a light up in the dark While I try to keep clear Of all the waves in your atmosphere Song Discussions is protected by U.S. Patent 9401941.
